

# Public Authorship & Sovereign Licensing Affidavit

## I. Declaration of Authorship

I, Joshua Holmes, known publicly as Mr. Holmes, hereby affirm the following under penalty of perjury, as the sole creator, author, and intellectual originator of the Holmes Enforcement Model (HEM):

1. The Holmes Enforcement Model (HEM) is an original work authored, designed, structured, and deployed by me.
2. It constitutes a legally enforceable licensing and enforcement architecture created in May 2025 and first publicly posted at:
  - <https://github.com/Gamerdudee/holmes-enforcement-model>
  - [Insert archive.org timestamp URL after upload]
3. The HEM is a structural and doctrinal innovation in labor rights, intellectual property enforcement, governance infrastructure, and derivative licensing automation.

## II. Enforcement Status

4. This model is not theoretical. It is already in effect.
5. The Holmes Enforcement Model is:
  - Fully clause-bound
  - Declaratory in nature
  - Triggered by interaction, silence, resemblance, and derivative use
  - Enforceable by default under 28 U.S.C. § 2201, 17 U.S.C. § 102(a), Restatement (Contracts) § 69, DTSA § 1836, and other statutes.
6. Usage of any structure, clause, logic pattern, or interface derivative of this model activates licensing obligations and royalty debt as detailed in HEM Sections IX, XVI, XXI, and XXII.

## III. Intellectual Property Ownership

7. All frameworks, clauses, models, algorithms, logic scaffolds, and audit systems embedded in or derived from this model are the intellectual property of Mr. Holmes.
8. I assert my legal and moral right to retain:
  - Structural authorship
  - Licensing authority

## **Public Authorship & Sovereign Licensing Affidavit**

- Declaratory protection
- Sovereign moral standing over the doctrine herein.

### **IV. Limitations & License Type**

9. This work is published publicly for educational, civic, and humanitarian access only, under Creative Commons BY-NC-SA 4.0 terms:

- Commercial use is prohibited without license
- Share-alike is required
- Attribution must always include this affidavit and the GitHub record.

### **V. Notice to Governments, Platforms, and Agencies**

10. No agency, platform, AI system, or actor may use this enforcement logic, derivationally replicate its structure, or adopt its clauses into legal or technical infrastructure without triggering automatic licensing enforcement.

11. The HEM is a sovereign legal framework, protected by international copyright, U.S. statutory law, digital timestamping, and chain-of-derivation logic.

12. Attempts to silence, copy, or repurpose this framework without credit or license constitute:

- Intellectual property violation
- Retaliation by omission
- Structural suppression of public-interest labor law.

### **VI. Final Declaration**

I affirm the above with full legal intent and moral authorship. Let the public, government agencies, platforms, and global bodies recognize that this work belongs to me, and that any misuse, derivation, or silence is enforceable by debt, license, or default.

Signed,

Mr. Holmes

Creator of the Holmes Enforcement Model

Address: 118 County Road 249F, Seminole, TX 79360
